

Appendix A

Additional rule 6.17.1.8.e

- In a 50m Three-Position Event, if there is a complaint of an unexpected zero (0) (missing shot) during the twenty-two (22) minutes MATCH/shot series, the following procedure will apply:
- The Jury member in Charge must immediately note the athlete's remaining time and instruct him to fire one (1) additional shot on the same target.
- If the additional shot is successfully registered, its score shall be counted and the unregistered shot shall be disregarded. No additional time will be allowed.
- If the additional shot is not registered, the Jury shall immediately instruct the athlete to move to a reserve target, with assistance from the Range Officer, taking care to ensure that other finalists are not disturbed. The athlete's Coach is allowed to approach and speak to his athlete whilst he is moving and preparing to shoot.
- Once established in his new position, the athlete will be allowed to complete all remaining kneeling, prone and standing sighting shots in the time that remained when his target malfunction occurred, plus an additional two (2) minutes. The Jury Member in Charge will remind him of his maximum remaining time.
- Whilst the affected athlete is being moved and completing his remaining shots, the original twenty-two minutes for the remaining Finalists will probably have expired. The CRO will command; "STOP, except for the athlete on firing point 'X'". Those athletes will be permitted to perform aiming exercises and dry firing whilst waiting for the affected athlete to complete his remaining Match shots and Standing preparation. That process should take a maximum time of seven (7) minutes.
- When the repositioned athlete's remaining time has expired, he will be commanded to stop. All athletes will then be allowed two (2) minutes to fire Sighting shots in the Standing position to prepare for the first series of Match shots. The Final will then continue as normal.
